Career Objective

Highly motivated Computer Science and Engineering (CSE) student with a strong foundation in web development, software engineering, and data-driven systems. Currently pursuing a Bachelor's degree at Independent University, Bangladesh (IUB), with a minor in Big Data and High-Performance Computing. Passionate about leveraging technology and innovation to drive impactful solutions. Seeking an opportunity at Unilever Bangladesh to apply my technical expertise, problem-solving abilities, and leadership skills in a dynamic and growth-oriented environment.

Education

Bachelor of Science in Computer Science and Engineering(CSE)

Independent University Bangladesh(IUB)

IUB,Bangladesh

Minor: Big Data and High Performance Computing.

Current CGPA(cumulative grade point average) : 3.83

ID : 2220281

Higher Secondary School Certificate (Science Group)

Barguna Residential Model College

February,2020

BRMC,Bangladesh

GPA(grade point average): 5.00

Secondary School Certificate (Science Group)

Garjunbunia Secondary School, Barguna

GPA(grade point average): 5.00

April,2018

Bangladesh

Junior School Certificate

Gazimahmud JR. High School

GPA(grade point average): 5.00

November,2015

Bangladesh

Professional Experience

Full-Stack Web Developer | Independent Projects

- Designed and deployed a full-scale web application for a movie production house, integrating secure authentication, responsive UI, and seamless user interactions.
- Developed scalable and high-performance web applications using React.js, Node.js, and MySQL, ensuring optimal efficiency and user experience.
- Implemented Firebase authentication for robust user security and optimized database management for improved data handling.

Research Assistant | FabSat (CanSat Project)

- Contributed to the development of embedded systems for satellite projects, focusing on real-time environmental data processing and telemetry optimization.
- Applied sensor data processing techniques to enhance remote monitoring and communication efficiency.

Cybersecurity Developer | Personal Research Project

- Developed and implemented RSA-based encryption algorithms to ensure secure data transmission and storage.
- Enhanced system security through data obfuscation and cryptographic techniques to protect sensitive information.

Robotics & Automation Engineer | Independent Projects

- Developed and implemented control algorithms for a Robotics Car project, enhancing movement precision and navigation capabilities.

Leadership Role | National Children's Task Force (NCTF)

- Successfully led the Barguna district as a leader in the National Children's Task Force (NCTF), an international organization, driving community engagement and advocacy initiatives.

Skill

Web & Software Development:

- **Front-End:** HTML, CSS, JavaScript, React.js, Tailwind CSS, Bootstrap
- **Back-End:** Node.js, Express.js, MERN Stack (MongoDB, Express.js, React.js, Node.js)
- **Database Management:** MongoDB, MySQL, Firebase (Realtime Database & Firestore)
- **Version Control:** Git, GitHub
- **Cloud Technologies & Deployment:** AWS (EC2, S3), Firebase Hosting, Vercel, Netlify
- **Frameworks & Libraries:** React.js, Redux, Axios, Tailwind CSS, Bootstrap

Programming & Computational Technologies:

- **Languages:** Python, JavaScript (ES6+), Java, C, C++
- **Core Concepts:** Data Structures & Algorithms, API Development & Integration, Parallel Processing & Optimization
- **Cybersecurity:** RSA Encryption

Achievements

- Developed and implemented a robust data-based security infrastructure that significantly reduced the organization's vulnerability to cyber threats.
- Successfully developed a fully functional website for a movie production house using Java, showcasing skills in web development, backend integration, and user experience design.
- Co-authored a research paper project titled "স্বরসংকেত: A Vision Transformer-based Bengali Sign Language Interpreter." This project focuses on developing a web application that translates Bengali sign language into text in real time using advanced deep learning and vision transformer models. Responsibilities included data collection, model training and evaluation, and the development of a REACT app with HCI components for accessibility. Additional features like language translation and text-to-speech generation are being explored to enhance functionality.

Projects

- **Gardening Tips Application (Full-stack)**
Developed a full CRUD web application using React for frontend and Express.js with MongoDB on backend (without Mongoose).
Implemented backend API endpoints to manage public and private gardening tips.
Ensured responsive UI and seamless user experience across devices.

Live Link: <https://the-gardener-s-hub.vercel.app/>

- **Real-Time Weather App (React)**

Created a React-based weather application with live updates on temperature, wind speed, and weather conditions integrated with an interactive map.

Ensured dynamic UI updates and seamless user experience across devices.

Live Demo: <https://weather-sphere.vercel.app/>

- **Auction Gallery (React, Vercel Deployment)**

Developed an online auction gallery platform featuring item listings, bidding functionality, and user-friendly navigation.

Live demo available at: <https://gemmy-auctions.vercel.app/>

- **World Travel Tracker (React)**

Developed a travel tracker app enabling users to mark visited countries, track stats, and explore global info.

Utilized React hooks and components for state and UI management.

Live Demo : <https://world-travel-tracker-react-project.vercel.app/>

- **Additional Projects:**

I have developed numerous other web applications and tools, demonstrating versatility and a continuous commitment to learning and improving my development skills.

Voluntary Works

- Works ACM club IUB program organization.
- Works IEEE club IUB program organization.
