PROFESSIONAL SUMMARY

Computer Science graduate from Independent University, Bangladesh (IUB) — CGPA 3.82/4.00, Vice Chancellor's Honour List, minor in Big Data & High-Performance Computing. Over two years of experience as a Software Engineer at US-based companies, building scalable full-stack applications with Next.js, Node.js, AI integrations (OpenAI, Gemini, Anthropic Claude), Stripe billing, Facebook Ads API, and custom CRM solutions. Also an undergraduate researcher at CCDS working on geospatial analysis and remote sensing. Seeking software engineering and research roles to build impactful, data-driven systems and contribute to AI/ML innovation.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, Java, C, C++
- **Frontend Development:** React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Bootstrap
- **Backend Development:** Node.js, Express.js, Fastify, RESTful APIs, WebSockets, Socket.io
- **Databases & ORM:** PostgreSQL (query optimization), MongoDB, MySQL, Redis, Firebase (Firestore & Realtime Database), Prisma ORM
- **Authentication & Security:** NextAuth, OAuth, JWT, RBAC, Authentication & Authorization, RSA Encryption
- **DevOps & Cloud:** AWS (EC2, S3), Docker, Nginx, Linux, CI/CD, GitHub Actions, Vercel, Netlify, Firebase Hosting
- **Architecture & Practices:** Microservices, MVC, SOLID Principles, Design Patterns, System Design & API Integration, Agile/Scrum, Responsive UI/UX
- **Tools:** Git, GitHub, Prisma, Axios
- **Research & Technical Expertise:** AI Integration, Machine Learning Fundamentals, Computer Vision, Geospatial Analysis & Remote Sensing, High-Performance Computing, Parallel Processing & Optimization, Data Structures & Algorithms
- **Soft Skills:** Research & Analytical Thinking, Team Collaboration & Communication, Problem Solving, Adaptability & Quick Learning, Time Management & Organization

PROFESSIONAL EXPERIENCE

Junior Software Engineer — NAFCORP Technologies (Remote) Jul 2026 – Present

- Developing PluginChatbot (pluginchatbot.com), an AI chatbot SaaS that businesses embed on their websites to deliver instant customer support and live AI responses — welcoming visitors, answering common questions, collecting contact details, and supporting online shoppers.
- Building and owning the full management dashboard, including product, platform, and use-case pages, with fully responsive UI/UX across devices.
- Implementing human-handoff functionality that lets team members step into conversations whenever human assistance is needed.

Software Engineer — Sharetasking (Remote, United States) Aug 2025 – Jul 2026

- Built and maintained multiple production SaaS products end-to-end, delivering subscription-based, multi-tenant platforms with Stripe billing and role-based access control.
- Built and maintained scalable full-stack applications using Next.js, Node.js, Fastify, Prisma, PostgreSQL, and MongoDB.
- Designed and developed dashboard systems including authentication, role-based access control, and core workflow functionalities.
- Integrated Stripe subscription billing, REST APIs, and third-party services including Facebook Ads API for automation and campaign management.
- Developed AI-powered features using OpenAI and Gemini APIs, including chatbot systems and automated website generation workflows.
- Worked on performance optimization, debugging, code maintainability, and responsive UI/UX improvements within Agile development environments.

Full Stack Engineer — JWeis Marketing (Remote, United States) Nov 2024 – Apr 2026

- Built and deployed a full-stack marketing automation platform using Next.js and Node.js, streamlining campaign workflows for the marketing team.
- Integrated HubSpot CRM, Mailchimp, and Facebook Ads APIs to automate customer data synchronization and multi-channel outreach, eliminating hours of manual work weekly.
- Developed AI-powered automation for personalized email generation and lead management, improving outreach efficiency and response rates.
- Architected backend APIs and optimized data workflows to support growing campaign volume and faster response times.

- Collaborated with remote cross-functional teams in Agile sprints to ship features and resolve production issues.

RESEARCH EXPERIENCE

Undergraduate Researcher — CCDS, Independent University, Bangladesh

2025 – Present

Topic: Mapping School Vulnerability to Brick Kiln Exposure in Bangladesh Using Remote Sensing and Geospatial Analysis | Supervisor: Dr. A. K. M. Mahbubur Rahman

- Conducting geospatial and remote sensing-based research for spatial exposure analysis and environmental risk assessment.
- Working with GIS data processing, spatial visualization, and analytical research methodologies for publication-oriented research.
- Collaborating on research documentation, data analysis, and technical reporting within the CCDS research environment.

Undergraduate Research Team Member — FabSat, IUB CanSat Project

- Contributed to embedded systems and telemetry development for CanSat communication systems.
- Improved data transmission reliability through optimized communication protocols and testing.

PROJECTS

MedAI — AI-Powered Healthcare Management Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Firebase Authentication

- Developed a full-stack AI-powered healthcare platform featuring patient management, appointment scheduling, diagnostics, billing, and health monitoring.
- Implemented AI-based symptom checking, health alerts, doctor-patient connectivity, and responsive dashboard functionalities.

Gardening Tips App — Full-Stack Plant Care & Tips Platform

Tech Stack: React.js, Tailwind CSS, Express.js, MongoDB, Firebase Authentication, JWT

- Developed a scalable MERN-based platform for sharing gardening tips with secure authentication and CRUD functionalities.
- Implemented interactive plant diagnosis features, seasonal planting guidance, and responsive dark/light theme support.

ChronicleInk — Subscription-Based News Publishing Platform

Tech Stack: React.js, Node.js, Express.js, MongoDB, Firebase Authentication, Tailwind CSS, Google Charts

- Developed a scalable news platform with premium subscription management and secure user authentication.
- Built an admin dashboard for managing users, publishers, articles, and platform operations, with data visualization features.

ACHIEVEMENTS

- Selected for the Dean's Merit List, Dean's Honour List, and Vice Chancellor's Honour List at IUB for academic excellence.
- Built a custom RSA-based encryption system with layered security features, enhancing data protection in simulated environments.
- Participated in ICPC (International Collegiate Programming Contest), demonstrating competitive programming and problem-solving skills.
- Led social impact projects as District Leader (Barguna) in UNICEF-backed NCTF, organizing large-scale child rights and health awareness campaigns.

EDUCATION

M.Sc. in Computer Science — Independent University, Bangladesh (IUB)

2026 – Present

B.Sc. in Computer Science & Engineering (CSE) — Independent University, Bangladesh (IUB)

2022 – 2026

CGPA: 3.82 / 4.00 | Minor: Big Data & High-Performance Computing

Higher Secondary Certificate (HSC) – Science — Barguna Residential Model College

2020

GPA: 5.00 / 5.00

CERTIFICATIONS

- **Cisco Certified Network Associate: Introduction to Networks (CCNA v7)**

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

- **District Leader — NCTF (UNICEF-linked youth program):** led child advocacy and community outreach with 500+ volunteers; organized education, health, and youth-engagement campaigns.
- **Campus Ambassador — ICT Olympiad Bangladesh:** promoted technology-focused initiatives and student engagement activities.
- **Volunteer — Independent University, Bangladesh:** organized academic, technical, and cultural programs under ACM, IEEE, and Music Club.
